RESOLUTION NO. 77-57

(Resolution of Acceptance for Subdivision
No. 2563 - Granada Estates)

WHEREAS, the final Subdivision Map for Subdivision No. 2563 has been presented to the Board for approval and acceptance; and

WHEREAS, said map has been signed by all necessary parties; and

WHEREAS, the Yolo County Planning Commission has considered and approved an Environmental Impact Report for the proposed project, with a finding that the proposed project will have a significant effect upon the environment, and said Environmental Impact Report has been presented to and considered by this Board; and

WHEREAS, the Yolo County Planning Commission approved the tentative map of Subdivision 2563 on September 15, 1976; and

WHEREAS, the improvements have been assured and the map in all respects complies with the provisions of the State Subdivision Map Act and of the local ordinances,

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of the County of Yolo as follows: (1) This Board, after consideration of the Environmental Impact Report filed upon the proposed project, hereby adopts and approves the final Environmental Impact Report filed upon this project, and finds that said final EIR has been completed in compliance with the California Environmental Quality Act and State Guidelines, and finds that the project will have a significant effect upon the environment. The subdivision will be constructed on land which is presently zoned (R-2), and development of said land will further increase the demand on the facilities of the Madison Service District, resulting in a significant effect on the environment. However, the Board hereby finds that the following factors warrant approval of the project notwithstanding said significant effect:

There is presently a shortage of housing in the Madison area,

1 which will be alleviated partially by said subdivision.

2 The land to be used for this subdivision is currently designated
3 for residential uses on the Yolo County General Plan, and is zoned
4 consistently therewith. Said land is within the boundaries of the
5 service district serving the Madison area with sewer and water
6 services, and said service district has agreed to provide said
7 services. Failure to use land designated residential on the
8 General Plan will result in increased pressures to develop for
9 housing purposes land designated for agricultural uses in the area.

10 The Environmental Impact Report on said project identifies
11 several mitigation measures, which are hereby found by this Board
12 to be appropriate and feasible, and ordered by this Board to be
13 incorporated into said project; (2) this Board hereby finds that
14 the proposed subdivision, together with the provisions for its
15 design and improvement, is consistent with general plan adopted
16 for the Madison area of the County of Yolo; (3) this Board hereby
17 approves said map for Subdivision No. 2563, Granada Estates; (4)
18 this Board hereby accepts on behalf of the public the easements and
19 rights of ways all as provided for and indicated on said final map.

20 BE IT FURTHER RESOLVED (1) that this Board approved
21 Agreement No. 77-134, the Subdivision Improvement Agreement for
22 said Subdivision No. 2563, Granada Estates, and authorized the
23 Chairman of the Board to sign said agreement. (2) The Clerk of
24 this Board hereby is authorized and directed to file a Notice of
25 Determination upon the proposed project; said notice shall include
26 the decision of this Board to approve the project, and the finding
27 of this Board that the proposed project will have a significant
28 effect upon the environment. Said notice also shall include the
29 statement of overriding consideration set forth hereinabove, and
30 the mitigation measures incorporated into the project, as stated
31 hereinabove. Said Notice also shall include the statement that
32 the Environmental Impact Report considered and approved by this

1 Board has been prepared pursuant to and is consistent with the
2 provisions of the California Environmental Quality Act and State
3 Guidelines adopted pursuant thereto.

4 PASSED AND ADOPTED by the Board of Supervisors of the County
5 of Yolo, State of California, this 14th day of June, 1977,

ARTICLE I - CONDITIONS

1. Projects located in urbanized areas (unless exempt) must be part of a program which serves to implement an areawide plan held currently valid by the regional transportation policy board.

2. Federal funds may participate only in work which has been officially programmed to and authorized by the Federal Highway Administration in advance of its performance.

3. Funds apportioned such as the STATE's share of FAS funds are considered Federal-aid funds.

ARTICLE II - IMPROVEMENTS/RESTORATIONS

1. The term "IMPROVEMENT" or "RESTORATION" as used herein means any work that is financed in part with Federal funds.

2. The Supplemental Local Agency-State Agreement (program supplement) shall be in a form prescribed by STATE; and shall designate who shall advertise, award, and administer the contract, the Federal funds requested, and the matching funds to be provided by LOCAL AGENCY, and, if a State Highway is involved, the matching funds to be provided by STATE. Adoption of the program supplement by LOCAL AGENCY and approval by STATE shall cause such program supplement to be a part of this agreement as though fully set forth herein. Unless otherwise delegated the program supplement shall be approved by the LOCAL AGENCY's governing body. Cooperative projects including work on a State highway shall be the subject of a separate cooperative agreement.

3. In processing IMPROVEMENTS or RESTORATIONS, LOCAL AGENCY will conform to all STATE statutes, regulations and procedures (including those set forth in the STATE's Local Programs Manual) relating to the Federal-aid program and to all applicable Federal laws, regulations, and policy and procedural or instructional memoranda. This includes, but is not limited to, the holding of public hearings when required, the publishing of various press notices, and the preparation of plans, specifications, and estimates.

4. Unless otherwise designated in the approved program supplement, improvements will be constructed by contract in accordance with

Certification Acceptance procedures approved by the FHWA. Such procedures require the use of Specifications described in the State's Certification; STATE approval of plans, special provisions and estimated costs prior to advertisement; a certification by LOCAL AGENCY with respect to the right-of-way; and advertisement for a minimum of 3 weeks prior to bid opening. The contract will be awarded by LOCAL AGENCY, its agent, or by STATE as may be determined between the parties prior to each project advertisement.

5. When the IMPROVEMENT or RESTORATION includes work to be performed by a railroad, the contract for such work shall be entered into by LOCAL AGENCY or by STATE, as parties hereto agree. A contract entered into by LOCAL AGENCY for such work must have prior approval of STATE. In either event, LOCAL AGENCY shall enter into an agreement with the railroad providing for maintenance of the protective devices or other facilities installed under the service contract.

6. LOCAL AGENCY shall provide or arrange for adequate supervision and inspection of each improvement, including contracts awarded by STATE. With prior State approval, surveying, inspection and testing may be performed by a consulting engineer provided an employee of LOCAL AGENCY is in responsible charge.

7. STATE shall exercise general supervision over Federal-aid improvements and may assume full and direct control over the project whenever STATE, at its sole discretion, shall determine that its responsibility to the United States so requires. LOCAL AGENCY contracts shall so stipulate.

ARTICLE III - RIGHTS-OF-WAY

1. No contract for the construction of a Federal-aid IMPROVEMENT or RESTORATION project shall be awarded until the necessary rights-of-way have been secured. Prior to the advertising of a project on a local street, LOCAL AGENCY shall certify and upon request shall furnish STATE with evidence that necessary rights-of-way are available for construction purposes or will be available by the time of contract award.

2. LOCAL AGENCY agrees to hold STATE harmless from any liability which may result in the event the right-of-way is not clear as certified. The furnishing of right-of-way as provided for herein includes, in addition to all real property required for the improvement free and clear of obstructions and encumbrances affecting the

proposed project, the payment as required by applicable law of damages to real property not actually taken but injuriously affected by the proposed improvement. LOCAL AGENCY shall pay from its funds any costs which arise out of delays to the contractor because utility facilities have not been removed or relocated, or because rights-of-way have not been made available to the contractor for the orderly prosecution of the work.

3. Subject to STATE approval and such supervision over LOCAL AGENCY's right-of-way acquisition procedures as STATE may determine is necessary, LOCAL AGENCY may claim reimbursement from Federal funds for expenditures to purchase rights-of-way included in an approved project.

4. The LOCAL AGENCY will comply with Title II and III of the Uniform Real Property Acquisition Policy.

5. Whether or not Federal-aid is to be requested for right-of-way, should LOCAL AGENCY, in acquiring right-of-way for a Federal-aid IMPROVEMENT, displace an individual, family, business, farm operation, or non-profit organization, relocation payments and services will be provided as set forth in Chapter 5 of Title 23, U.S. Code. The public will be adequately informed of the relocation payments and services which will be available, and, to the greatest extent practicable, no person lawfully occupying real property shall be required to move from his dwelling or to move his business or farm operation without at least 90-days written notice from the LOCAL AGENCY. LOCAL AGENCY will provide the State with specific assurance, on each project, that no person will be displaced until comparable decent, safe and sanitary replacement housing is available within a reasonable period of time prior to displacement, and that LOCAL AGENCY's relocation program is realistic and is adequate to provide orderly, timely and efficient relocation of displaced persons for the project as provided in FHPM 7-5.

ARTICLE IV - FISCAL PROVISIONS

1. When a Federal-aid IMPROVEMENT or RESTORATION contract is to be awarded by STATE, matching funds will be provided by LOCAL AGENCY prior to the time that such funds are required to reimburse contractor. STATE will bill LOCAL AGENCY for amount due immediately following contract award, or at option of LOCAL AGENCY, will submit monthly bills during life of contract.

2. The estimated total cost of Federal-aid projects, the amounts of Federal-aid programmed, and the matching amounts agreed upon may be

adjusted by mutual consent of the parties hereto, provided funds are available to cover increases and provided Federal Highway Administration concurs in any increase in the Federal-aid.

3. Upon submittal by LOCAL AGENCY of a statement of expenditures for Federal-aid improvements, STATE will pay its agreed share and if permitted by State Law will advance an amount equal to the legal pro rata Federal share of the costs believed to be eligible for participation with Federal funds or will voucher Federal Highway Administration for reimbursement.

4. LOCAL AGENCY shall use its own funds to finance the local share of eligible costs and expenditures ruled ineligible for financing with Federal funds. STATE shall make preliminary determination of eligibility for Federal fund financing. Ultimate determination shall rest with the Federal Highway Administration. Any overpayment of amounts due shall be returned to STATE upon demand.

5. When any portion of a LOCAL AGENCY project is performed by STATE, charges therefor shall include assessment on direct labor costs in accordance with Section 8755.1 of the State Administrative Manual. The portion of such charges not financed with Federal funds shall be paid from funds of LOCAL AGENCY.

6. Should LOCAL AGENCY fail to pay monies due STATE within 30 days of demand or within such other period as may be agreed between the parties hereto, STATE, acting through State Controller, may withhold an equal amount from future apportionments due LOCAL AGENCY from the Highway Users Tax Fund.

7. Auditors of STATE and the United States shall be given access to LOCAL AGENCY's books and records and shall be given such assistance and information as is requested for the purpose of checking costs paid, or to be paid by STATE hereunder.

ARTICLE V - MISCELLANEOUS PROVISIONS

1. This agreement shall have no force or effect with respect to any project unless and until said project has been authorized by the Federal Highway Administration and a Program Supplemental Agreement has been executed.

2. The Congress of the United States, the Legislature of the State of California, and the Governor of the State of California, each within their respective jurisdiction, have prescribed certain employment practices with respect to contract and other work financed

with Federal or State funds. LOCAL AGENCY shall insure that work performed under this agreement is done in conformance with rules and regulations embodying such requirements where they are applicable. Nondiscrimination Assurances, Exhibit "A", are hereby considered a part of this agreement.

3. When Federal funds are to participate in the cost of work done by a consultant, the agreement or contract with the consultant may not be executed or awarded until the selection of the consultant and the terms of the agreement or contract have been approved by STATE. Such agreement or contract shall include a provision that the work and records of the consultant are subject to inspection at all times by representatives of LOCAL AGENCY, STATE and the Federal Highway Administration and that agreement or contract may be terminated by LOCAL AGENCY upon a finding that the consultant is failing to live up to the terms of the agreement or contract. All major changes in the agreement or contract must have prior approval of the STATE. As soon as agreement or contract with consultant has been awarded, two certified copies of said agreement or contract shall be submitted to STATE.

4. LOCAL AGENCY and its contractors shall retain all original records and documents relating to work hereunder financed in part with Federal funds and shall make same available for inspection by STATE and Federal representatives upon request. Following final settlement of the project accounts with the Federal Highway Administration, such records and documents may be microfilmed at the option of LOCAL AGENCY, but in any event shall be retained for a three-year period after FHWA payment of final voucher, or a four-year period from the date of final payment under the contract, whichever is longer.

5. (a) Neither STATE nor any officer or employee thereof shall be responsible for any damage or liability occurring by reason of anything done or omitted to be done by LOCAL AGENCY under or in connection with any work, authority or jurisdiction delegated to LOCAL AGENCY under this agreement. It is also understood and agreed that, pursuant to Government Code Section 895.4, LOCAL AGENCY shall fully indemnify and hold STATE harmless from any liability imposed for injury (as defined by Government Code Section 810.8) occurring by reason of anything done or omitted to be done by LOCAL AGENCY under or in connection with any work, authority or jurisdiction delegated to LOCAL AGENCY under this agreement.

(b) Neither LOCAL AGENCY nor any officer or employee thereof, shall be responsible for any damage or liability occurring by reason of anything done or omitted to be done by STATE under or in connection with any work, authority or jurisdiction not delegated to LOCAL AGENCY under this agreement. It is also understood and agreed that, pursuant to Government Code Section 895.4, STATE shall fully indemnify and hold

LOCAL AGENCY harmless from any liability imposed for injury (as defined by Government Code Section 810.8) occurring by reason of anything done or omitted to be done by STATE under or in connection with any work, authority or jurisdiction not delegated to LOCAL AGENCY under this agreement.

ARTICLE VI - MAINTENANCE

1. Upon acceptance by the awarding authority of a completed Federal-aid project or upon the contractor being relieved of the responsibility for maintaining and protecting a portion of the work, the agency having jurisdiction over the transportation facility shall maintain the completed work in a manner satisfactory to the authorized representatives of the State and the United States. If, within 90 days after receipt of notice from STATE that a project on a transportation facility under its jurisdiction or any portion thereof, is not being properly maintained, LOCAL AGENCY has not satisfactorily remedied the conditions complained of, the approval of further Federal-aid projects of LOCAL AGENCY will be withheld until the project shall have been put in a condition of maintenance satisfactory to STATE and the Federal Highway Administration. The provisions of this section shall not apply to a transportation facility which has been vacated through due process of law.

2. The maintenance referred to in paragraph 1 above includes not only the physical condition of the facility but its operation as well. Traffic Operations Improvements on local streets shall be maintained by an adequate and well-trained staff of traffic engineers and technicians. Said maintenance staff may be employees of a LOCAL AGENCY, another unit of government or a consultant under contract with a LOCAL AGENCY.

IN WITNESS WHEREOF, the parties have executed this agreement by their duly authorized officers.

Negative Declaration
Land Division Plat #2618
William MacLaughlin
Assessor's Parcel Nos. 8-290-06,
8-140-65, 8-140-75

The applicant proposes to divide a 6.9+ acre parcel into three parcels of 2.35+, 1.15+ and 3.4+ acres each north of West Capitol Avenue and immediately East of the proposed alignment of State Route 84. The area is currently zoned Community Commercial (C-2), and designated on the East Yolo Area General Plan RH (High Density Residential).

This proposal could conceivably have significant environmental impact which would require an EIR. In this case a Negative Declaration is believed appropriate for the following reasons:

1. The proposal will enable the completion of an existing commercial development in an area zoned commercially.
2. The proposal will generally aid the establishment of land uses compatible with the General Plan.

*NOTE:--The purposes must correspond in every particular with those stated in the election notice.

SPECIAL NOTES:

Education Code Section 21809 provides that the bonds shall be signed by the chairman of the board of supervisors, "or by such other member thereof as the board of supervisors shall by resolution adopted by a four-fifths vote of all its members, authorize and designate for that purpose". If it is desired to have the bonds signed by such member rather than the chairman, then the Resolution and Order, and the bond form, should be changed accordingly, and the Resolution and Order must be adopted by such four-fifths vote.

Education Code Section 22051 provides for redemption of school bonds prior to their maturity at the option of the governing board of the school district. The prescribed statutory procedure and the wide diversity of possible redemption provisions render impracticable a general printed form for such matters. It is therefore suggested, should redemption provisions be desired, that competent financial and legal advice be first obtained.

Education Code Section 22012 authorizes the board of supervisors to divide the principal amount of any issue into two or more series and fix different dates for the bonds of each series. If this is done, instead of this form use Form No. 5013-A for Series A and use Form No. 5013-B for any series subsequent to Series A.

Each bid, together with bidder's check, must be enclosed in a sealed envelope addressed to the Board of Supervisors of said County, and endorsed "Proposal for School Bonds of Winters Joint Unified School District, of Yolo, Solano & Napa Counties."

BID CHECK: With each bid must be submitted a certified check or cashier's check for \$..... drawn on a bank or trust company transacting business in the State of California, payable to the order of the County Treasurer, to secure the district from any loss resulting from the failure of the bidder to comply with the terms of his bid. In addition bidders are requested (but not required) to supply an estimate of the total net interest cost to the district on the basis of their respective bids, which shall be considered as informative only and not binding on either the bidder or the district. Checks of the unsuccessful bidders will be returned by the County Clerk by mail, upon the award of the bonds. No interest will be paid upon deposit made by any bidder.

There is no litigation pending concerning the validity of the above issue, the corporate existence of the district, or the title of the officers to their respective offices and the Board of Supervisors will deliver to the successful bidder a no-litigation certificate certifying to the foregoing as of and at the time of the delivery of the bonds.

RESOLUTION NO. 77-85

(Resolution Initiating Proceedings for Community

WHEREAS, a resolution of application for reorganization consisting of the detachment of territory from the Springlake Fire Protection District and the annexation of this same territory to the City of Woodland was adopted by the City of Woodland on June 27, 1977, requesting initiation of proceedings for accomplishment of said reorganization. Said resolution was filed with the Yolo County Local Agency Formation Commission; and

WHEREAS, the Yolo County Local Agency Formation Commission has reviewed said application, duly held the public hearing as required by law on said application, and has filed with the Board of Supervisors of Yolo County its resolution No. 77-4, dated July 25, 1977, making determination and approving said application with conditions; and

WHEREAS, said Commission has considered and adopted the negative declaration on the proposed reorganization; and

WHEREAS, a copy of said resolution No. 77-4 has been filed with the Clerk of this County.

NOW, THEREFORE, BE IT RESOLVED AS FOLLOWS:

1. That each of the foregoing recitals is true and correct.
2. The nature of the proposed change in organization and the name or names of all districts for which any such change of reorganization is proposed are as follows:

Detachment of territory from the Springlake Fire Protection District;

Annexation of territory to the City of Woodland.

3. Preliminary proceedings were commenced by resolution of application of the City of Woodland, resolution No. 2713, dated June 27, 1977. The reasons for the proposed reorganization as

1 set forth in the resolution of application are as follows:

2 (a) Residents and landowners in the subject territory
3 have made known their pressing need for the provision of urban
4 services from the City of Woodland.

5 (b) The City of Woodland has received a letter from the
6 Springlake Fire Protection District stating that there is no
7 objection to detaching the subject territory from said district
8 and annexing it to the City of Woodland.

9 (c) The City of Woodland has previously annexed, from time
10 to time, all of the lands on three (3) sides of the subject
11 territory and the remaining unincorporated area results in
12 confusion and irrational boundaries for the Springlake Fire
13 Protection District, for the City of Woodland, for the County,
14 and for the State with regard to the responsibilities in unincor-
15 porated areas.

16 (d) The subject territory is an urbanized area having
17 service needs substantially similar to that of other urbanized
18 areas which are incorporated and which require municipal govern-
19 ment.

20 (e) Private domestic water wells in the subject area are
21 failing and a grave health hazard will likely occur if the subject
22 territory is not annexed to the City of Woodland in order to
23 receive the prompt benefits of city domestic water service.

24 (f) Annexation of the subject territory to the City of
25 Woodland will result in improved economies of scale and govern-
26 mental operations and improved coordination of the planning
27 and delivery of services.

28 (g) The residents and taxpayers of the County of Yolo
29 will benefit from the proposed reorganization as a result of
30 savings to the County and the reduction of services required
31 to be provided by the County in unincorporated, but urbanized
32 areas.

1 (h) The subject territory proposed to be annexed to the
2 City of Woodland is geographically, socially, economically,
3 and politically part of the same urban area of which the City
4 of Woodland is also a part.

5 (i) The proposed reorganization will be consistent with
6 the Yolo County Local Agency Formation Commission guidelines
7 adopted in Resolution 73-10.

8 4. The reorganization was approved by the Yolo County Local
9 Agency Formation Commission subject to the condition that the
10 reorganization shall be effective on the commissions filing
11 of the certificate of completion with the Secretary of State
12 as provided in Government Code § 56456, and that the Board
13 of Supervisors shall not make any changes in the boundaries
14 as approved by said Commission. For a full and complete
15 description of said reorganization, the boundaries of the
16 territory effected by said reorganization and the terms and
17 conditions applicable thereto, reference is hereby made to
18 the Yolo County Local Agency Formation Commission Resolution
19 No. 77- 4 , dated July 25, 1977.

21 at the chambers of the Board of Supervisors, Room 207, County
22 Courthouse, Woodland, California, is fixed as the date, time,
23 and place of the hearing on the proposed reorganization.

24 6. Any interested persons desiring to make written protest
25 against said reorganization shall do so by written communication
26 filed with the Clerk of the County, not later than the hour
27 set for hearing. A written protest by a landowner shall contain
28 a description sufficient to identify the land owned by him; a

DAVIS, CALIFORNIA 95616

STATEMENT OF THE LEAGUE OF WOMEN VOTERS OF DAVIS
BEFORE THE YOLO COUNTY BOARD OF SUPERVISORS
August 9, 1977

ON TRANSPORTATION OF WATER FROM YOLO COUNTY

The League of Women Voters of Davis, on the basis of our state position supporting "management of water resources in ways which are beneficial to the environment," is concerned about the proposed transportation of water from Yolo County to the Berrenda-Mesa Water District. We are interested in seeing that correct procedures are followed, and that citizens have an opportunity to express their views before this decision is made.

In the interest of high standards of water quality we believe that the State should be responsible for the regulation of underground pumping and that the efforts of various agencies concerned with both quantity and quality of water should be coordinated.

Particularly in this period of drought we urge you to draw to the attention of the State Water Resources Board the concerns of our county and to insist that the environmental consequences of this decision be thoroughly investigated and weighed.

Sincerely,

Mary Lowry
President, League of Women Voters of Davis

Yolo County Supervisors

Dear Supervisors:

I am strongly opposed to the water transfer from Yolo County by ANDCO Company. My objection is that I feel water is a natural resource as vital as air to our very existence and therefore should never be sold for profit — especially private profit!

If it is necessary to redistribute our state water supply, it should be done by a State (or National) agency on a non-profit (at cost) basis.

Thank you for considering my thoughts.

Yours truly,

ADDENDUM TO MAST LAND DIVISION E.I.R.

The following supplemental comment is provided by the Yolo County Planning Department in response to the draft E.I.R. submitted on behalf of the Mast family land division proposal.

Review of the E.I.R. by the Planning Department staff indicates that the draft E.I.R. is generally satisfactory, although the following clarifications are offered for specific sections of the E.I.R.

On Page 10, outline Section #2 Energy Uses and Conservation, the applicant states that the division will not result in increased energy use or additional construction. This is a very narrow interpretation in staff's opinion. Once the division is effectuated, there is the possibility that one additional farm headquarters, involving a residence and any appurtenant structures required could be constructed some time in the future. This would involve increased use of energy and construction.

Again on Page 10, under outline Section #3 Population, an increase in population could conceivably occur in staff's opinion if the parcel created was obtained by someone outside the Mast family in the future.

Once again on Page 10, outline Section #6 Aesthetics, the E.I.R. speaks only to the act of creating the parcel and does not look beyond to the possible visual impact an additional dwelling and farm headquarters could have, if established on the parcel created.

Within Outline Section IV, ENVIRONMENTAL IMPACT on Page 11, and specifically those sub-topics entitled WATER, WASTE and AIR, staff would like to express the following.

Although the division will have no direct and immediate effect on runoff or drainage and will not create additional solid or liquid wastes nor impact air quality, in the long run, if the parcel created is subsequently sold, measureable impacts on water, wastes, air and traffic could all occur.

B. Project Objective

The project objective is to divide a 95 acre parcel of land, held by the owners as tenants in common, into two parcels. One parcel is to be held by them in common, and the other is to be held solely by Jack D. Mast. This division is part of a series of land divisions between the owners which will result in each owning the land on which his or her personal residence is located. This will eliminate estate planning problems resulting from the multiple ownership of the land on which their respective residences currently stand. The proposed division will require the approval of Yolo County Planning Agencies. ✓

C. Project Location

The site of the proposed division is a 95 acre parcel in central Yolo County, approximately 2 miles northeast of Esparto. The site is bordered on the North by the West Adams Canal and on the South by Cache Creek.

II. DESCRIPTION OF PROJECT

A. Project Plans

1. Detailed description of the site plan:

- a. Agricultural land use
- b. The 95 acre site will be subdivided into 2 parcels with the following approximate acreages:

Northerly Parcel	38 acres
Southerly Parcel	57 acres
- c. No structures are to be built. ✓
- d. No additional amenities are to be constructed.
- e. The proposed division is shown on the site plan map attached.

2. Circulation:

The existing extension of county road 19A will continue to be used as it has been used in the

past. NO improvement to any road is planned. No additional traffic, nor traffic disruption will be generated by the division.

3. Population:

No increase in population will result from the division.

4. Services:

No services or utilities will be altered or created.

5. Project Phasing:

All transfers of title will occur at once.

6. Conformance with general plan documents:

The Master Plan of the County of Yolo designates an agricultural land use for the project site. The plan permits "agricultural uses only, with new residential subdivisions prohibited...except those directly related to and incidental to the agricultural operations conducted upon the land." According to the Yolo County Zoning Code the project site is zoned "A-P" any subdivision of "A-P" land requires approval of Yolo County Planning Agencies.

B. Construction and Operational Plans

1. Extent of site clearing:

No site clearing is required.

2. Excavation:

No excavation is required.

3. Drainage Plans:

Drainage is by way of surface runoff and soil percolation. No impervious surface will be added. All drainage will be controlled by existing irrigational systems.

4. Utilities:

No additional utilities will be required.

5. Revegetation:

The land will be commercially farmed.

6. Maintenance:

Maintenance will be conducted in the normal course of farming operations.

7. Other Construction Aspects:

There are no other construction aspects.

III. ENVIRONMENTAL SETTING

A. Natural Environment

1. Geologic and pedologic conditions:

- a. Geomorphically, the site is essentially level. Along the northern perimeter of the project site lies the West Adams Canal. Along the southern perimeter lies Cache Creek.
- b. There apparently are no major active faults transecting any of the major inhabited areas of Yolo County. Major fault zones lie to the west, along the Pacific Coast in the San Andreas Fault Zone and to the east, along the Sierra Nevadas.
- c. The U. S. Department of Agriculture classifies the soil in the project area into three basic types:

1. Loamy Alluvial Land

Loamy alluvial land (Lm) is a land type that consists of such highly variable soils that, for the purposes of this survey, it was impractical to classify and map them separately. These soils are nearly level and excessively drained. They formed in mixed, stratified alluvium recently deposited adjacent to streams. They have a texture of sand, sandy loam, loam, and silt loam, and they are underlain, at a depth of 24 to 40 inches, by sand and gravel. Slopes are 0 to 2 percent. Elevation ranges from 25 to 400 feet. The annual temperature is 62° F., the annual rainfall is 16 to 20 inches, and the frost-free season is about 270 days. The vegetation is chiefly annual grasses, herbs, willows, tamarix, and cottonwood. Loamy alluvial land is associated principally with Reiff and Soboba soils.

Included in mapping are small areas of Reiff gravelly loam, Soboba gravelly sandy loam, and Yolo silt loam. Also included, near the Colusa County line and the Colusa drainage canal, is an area that is subject to flooding for a period of more than 48 hours about once in every 2 years.

Permeability is rapid. Surface runoff is very slow, and there is little or no erosion hazard. The available water holding capacity is 2.0 to 4.0 inches. Rooting depth is 24 to 40 inches. Natural fertility is moderately high.

This land type is used mainly for dryland pasture, alfalfa, tomatoes, and almonds. It also is used as wildlife habitat and for recreation. Capability unit IVs-4 (17).

2. Soboba Series

The Soboba series consists of excessively drained very gravelly loamy sands on alluvial fans. Slopes are less than 1 percent. The soils formed in alluvium from sedimentary rocks. Elevation ranges from 25 to 400 feet. Annual temperature is about 61° F., annual rainfall is 16 to 20 inches, and the frost-free season is about 260 days. Vegetation consists of annual grasses, forbs, scattered oaks, saltcedar, and willow. Soboba soils are associated principally with Loamy alluvial land and Riverwash.

In a typical profile, the surface layer is pale-brown gravelly sandy loam and very gravelly loamy sand about 11 inches thick. The substratum is light brownish-gray very gravelly loamy sand that is highly stratified with sand and gravel lenses to a depth of more than 60 inches.

Soboba soils are used for irrigated row crops, irrigated pasture, dryland pasture, wildlife habitat, and recreation.

Soboba gravelly sandy loam (Sn). --This soil is on alluvial fans. Slopes are less than 1 percent.

Representative profile, 1,000 feet north of the west end of the big barn of the Fulton

Stephens Ranch headquarters, 1.5 miles northwest of Esparto; the profile, when examined, was moist below a depth of 17 inches.

Included in mapping are small areas of Arbuckle gravelly loam, Loamy alluvial land, Reiff very fine sandy loam, Reiff gravelly loam, and Riverwash.

This Soboba soil is very rapidly permeable. Surface runoff is very slow, and the erosion hazard is none to slight. The available water holding capacity is 2.5 to 3.5 inches. The effective rooting depth is more than 60 inches. Natural fertility is low.

This soil is used mainly for dryland pasture. Other uses include irrigated grain sorghum and irrigated pasture, wildlife habitat, and recreation. Capability unit IVs-4 (17).

3. Yolo Series

The Yolo series consists of well-drained silt loams and silty clay loams on alluvial fans. Slopes are 0 to 2 percent. The soils formed in alluvium from sedimentary rocks. Elevation ranges from 25 to 400 feet. The average annual temperature is 60°F., the annual rainfall is 16 to 22 inches, and the frost-free season is about 270 days. In uncultivated areas the vegetation is annual grasses and forbs. Yolo soils are associated principally with Brentwood and Reiff soils.

In a typical profile, the soil is grayish-brown to pale-brown silt loam and silty clay loam that extends to a depth of more than 60 inches. In some areas the soil is silty clay loam throughout the profile.

Yolo soils are used for orchard, row crops, forage crops, truck crops, irrigated pasture, dryfarmed grain, wildlife habitat, and recreation.

Yolo silt loam (ya). --This soil is on alluvial fans. Slopes are less than 1 percent.

Representative profile (fig. 5), 90 feet east of center of field road, 3,150 feet

west of State Highway 113, and 160 feet south of center of Hutchinson Drive on the property of the University of California at Davis; the profile, when examined, was moist below a depth of 2 inches.

Included in mapping are small areas of Arbuckle gravelly loam, Brentwood silty clay loam, Loamy alluvial land, Reiff very fine sandy loam, Soboba gravelly sandy loam, Sycamore silt loam, and Zamora loam. Also included are some areas where slopes are 2 to 5 percent.

This Yolo soil is moderately permeable. Surface runoff is very slow, and the erosion hazard is none to slight. The available water holding capacity is 9.0 to 11.0 inches. The effective rooting depth is more than 60 inches. Natural fertility is high.

This soil is used mainly for almonds, walnuts, corn, sugar beets, tomatoes, alfalfa, and melons. Other uses include dryfarmed barley, wildlife habitat, and recreation. Capability unit I-1 (17).

d. There are no unusual or significant features.

2. Hydrologic Conditions:

a. Surface Water: With the exception of Cache Creek and West Adams Canal paralleling the southern and northern perimeters, no surface water or ponds were observed during site investigation. Erosion is negligible. Drainage on the site is controlled through the use of a comprehensive irrigation system. The topography of the site is relatively flat for the most part.

No increase in surface runoff flows is expected to occur upon completion of the division. The topography will remain essentially level, thus ruling out any erosion and siltation problems due to project implementation. The surface water in Cache Creek and West Adams Canal will be unaffected.

- b. Ground Water: Groundwater depth is 50± feet below ground level. Use of wells in the vicinity of the project site provide irrigation for agricultural crops. This estimate was given to the consultant by well drillers with many years experience in the area of the project site.
 - c. Water Quality: Ground water quality will not be materially affected by this project.
 - d. Hazards: Cache Creek presents no significant flood or health hazards.
3. Atmospheric conditions:
- a. Climate: Generally, Yolo County is mostly sunny; however, areas in the south part of the county have a higher rate of humidity than areas in the north. This is due to maritime air flows. The fogs in winter may last from two days to three weeks with humidities close to 100 percent. Temperatures in summer are warm to hot, averaging 95 degrees or higher over most of the county. Maximum summer time temperatures observed for this area is listed as being 111 degrees, and the minimum is listed as 19 degrees. Average annual rainfall for this area is 16 inches. Winds blow from a southerly direction most of the year. Occasionally, north winds may blow from the north during summer.
 - b. Air Quality: The primary source of the constituents of photochemical smog is exhaust emissions from vehicles with internal combustion engines. It is estimated that 80 percent of the hydrocarbons and 90 percent nitrogen oxides emitted into the air in the Sacramento area comes from motor vehicles. The proposed project, will result in no additional air pollutants. Air quality is regulated by the Yolo-Solano Air Quality Board which regulates agricultural burning.
4. Vegetation and Wildlife:
- a. Plant varieties occurring on the site are those common to agricultural-weed field plant communities in the Sacramento area. The plants occurring on the site are comprised of grasses, broad leaf forbs and other plants that are considered to be "weeds" by man.
 - b. There are no high fire potential species of plants on the land due to its agricultural use.

- c. There are no rare or endangered plant species or undisturbed or unique vegetation communities on or in the vicinity of the division.
- d. Most of the common animal wildlife which may be found on the project site may include, but are not limited to, the following species: moles, hares, gophers, rodents, ground squirrels, ring neck pheasants, valley quail, songbirds, a few species of reptiles and other small animals.
- e. A riparian community exists in the southern perimeter of the site on the banks of Cache Creek. Running water is important to their support. Plants common to riparian communities include sycamore, cottonwood, willow, laurel, bigleaf maple, wild grape, cat-tail, mulefat, bullrush, and poison oak. Birds especially dependent on this community are Red-Tailed Hawk, California Quail, Ring-necked Pheasant, Screech Owl, Great Horned Owl, Acorn Woodpecker, Nuttall's Woodpecker, Black Phoebe, Scrub Jay, White-breasted Nuthatch, Bewick's Wren, Mockingbird, Starling, Hutton's Vireo, Brown-headed Cowbird and Song Sparrow. Bullfrog, yellow-legged frog, Pacific treefrog, California newt and tiger salamander make up the representative amphibian population. Western garter snake, common garter snake, racer, Pacific pond turtles and western fence lizard are common to the community. California gray fox, brush mouse, opossum, black-tailed jackrabbit, raccoon, beaver, long-tailed wasel, California mink, California spotted and striped skunk, California river otter, bobcat, and blacktailed deer are inhabitants of riparian habitats in Yolo County.
- f. There are no rare or endangered animal species on or in the vicinity at the site.

B. Socio-Cultural and Socio-Economic Factors

1. Cultural Resources:

No known sites of archaeological or historical significance are located on the project site, and other than farming, minimal use of the site has been made during the past decade. The project site is not known for any events of local, state, or national historical significance. There are no recorded archaeological sites, no state registered landmarks, no state points of historical

interest, and no mention on the national register.

2. Energy Uses and Conservation:

The division will result in no increased energy use, nor construction.

3. Population:

The only permanent residents on the effected parcel are the Jack D. Mast Family. No increase in population will result from the division.

4. Land Use:

The site is currently vacant of any buildings, streets, or improvements except for the existence of a family residence and several farm buildings on the northerly one-half of the parcel. Other than farming, there are no indications that the site has been used for the past decade. Currently all lands surrounding the project site are used for farming purposes.

Zoning on the project site is "A-P" surrounding land is zoned "A-P" and "A-1". Single-family residences on parcels containing 5 more acres, are conditional uses in the "A-1" zone. Historically, the site has been designated on the General Plan, zoned and used for agricultural purposes.

5. Public Facilities:

Agencies responsible for providing the following services to the project:

- a. Police: Yolo County Sheriff's Department and California Highway Patrol.
- b. Fire Protection: Esparto Fire District.
- c. Schools: Esparto Joint Unified School District.
- d. Utilities: Pacific Gas and Electric Company, Pacific Telephone Company; water service provides by individual wells.
- e. Solid waste disposal: Hauled by the residents.
- f. Other services are provided by Yolo County.

6. Aesthetic:

Existing aesthetic conditions on the project site are primarily open space benefits. The proposed division will have no visual impact.

7. Nuisance:

The division will result in no additional nuisance. Prevailing ambient noise levels affecting the site are those originating from large farm machinery and truck traffic associated with neighboring farm areas. The proposed project will become an insignificant element in the noise environment in the vicinity of the project site.

8. Economic:

The proposed division will have no economic impact on cost-revenue balances or local revenues.

IV. ENVIRONMENTAL IMPACT

A. Natural Environment

SOIL

No alteration of soils will result, other than that resulting from soil preparation pursuant to farming operations.

VEGETATION

No alteration of existing vegetation will result other than crop rotation.

WILDLIFE

No additional impact on local wildlife will result. Cultivation has already discouraged small mammals from inhabiting the site.

WATER

No alteration in water use is anticipated. The division will have no effect on runoff because the existing drainage will be maintained.

WASTES

No liquid or solid wastes is anticipated from this project.

AIR

✓ No effect on air quality is anticipated. ✓

TRAFFIC

No increase in vehicular traffic is anticipated.

B. Socio-Cultural and Socio-Economic Factors

SCHOOLS

No increase in school age children will result.

POLICE

There will be no impact on existing police services.

CULTURAL RESOURCES

There will be no socio-cultural impacts.

ENERGY USE

There will be no increase in energy use.

CONSERVATION

No increase in water use or runoff is anticipated.
No erosive impact is foreseen.

V. SUMMARY OF IMPACTS AND THEIR DISPOSITION

A. Unavoidable Adverse Effects

The following summarizes potential environmental impacts that are unavoidable should the proposed project be implemented. These considerations are numbered sequentially, and mitigation measures described in a following section bear corresponding numbers.

1. The proposed division results in the creation of one additional potential homesite on the southerly portion of the parcel.
2. The proposed division results in two smaller, potentially economically inefficient parcels of agricultural land.
3. The presence of a potential homesite creates a potential conflict with the agricultural character of the southerly portion of the parcel.
4. The proposed division might serve as a precedent allowing the split of "A-P" land.

B. Mitigation Measures Proposed to Minimize Adverse Impacts

1. Although the division results in the creation of an

additional potential home site, the probability of the construction of a home is unlikely in light of the multiple ownership of the proposed southerly parcel.

2. Although the division will result in two smaller agricultural parcels, the probability of them becoming economically inefficient is considered to be quite low in light of the historical agricultural use of this land by the Mast Family which farms other agricultural land contiguous to the effected parcel. Additionally the smaller parcel will be nearly 40 acres which is generally recognized as an economically viable parcel size.
3. Historically the parcel has been farmed as one piece of agricultural land in conjunction with contiguous agricultural land farmed by the Mast family. The northly parcel contains farm buildings and the residence of Jack Mast and the other owners reside in residences located on property which they will solely own as a result of this series of land divisions. As a result of this it is considered highly unlikely that any residential or farm structures will be constructed on the southerly parcel. Even if any structure were located on the parcel it would constitute only a negligible impediment to agricultural operations.
4. The proposed division creates no precedent for splitting "A-P" land. The precedent for splitting "A-P" land for estate planning purposes has already been set by the Cochoran Estate.

C. Alternatives to the Proposed Action

The only possible alternative is no action. This would be an unacceptable alternative inasmuch as it would result in considerable estate planning difficulties for the parties involved. In light of the minimal environmental impact of the proposed division of land complete inaction would appear to be unwarranted.

D. The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity

The proposed subdivision will have no impact on the existing use of the land involved. It is currently cultivated as productive agricultural land and will continue to be so cultivated in the future. Clearly the preservation of open space and economic productive contemplated are beneficial to the environment and

constitutes no negative environmental impact. Deferring the proposed land division to a later point in time would result in no minimization of environmental impact inasmuch as the anticipated environmental impact resulting from action at this time is negligible.

E. Irreversible Environmental Changes

The proposed subdivision of land would result in no irreversible environmental change. The land will remain open space under active agricultural cultivation. Water drainage will be accommodated by the existing irrigation system with no sedimentation or effect on water quality. There will be no increased air pollution or increased demands on ground water. There will be no impact on existing animal and plant habitats. The proposed subdivision of land involves no consumption of essential non-renewable energy resources or non-renewable natural resources.

F. Growth Inducing Impact

The growth inducing impact of the proposed subdivision of land is limited to the creation of one additional home site on the southern portion of the parcel. It is considered highly unlikely that any single family residence will ever be located on that site inasmuch as the entire parcel is currently farmed by the Mast family who controls and farms extensive areas of farm land in the region.

VI. ORGANIZATIONS AND PERSONS CONSULTED

Information provided by Laugenhour & Meikel by the University of California was used in the preparation of this report. In addition, certain information was provided by the Yolo County Planning Department.

VII. PUBLIC POLICIES, LAWS, AND REGULATIONS RELATED TO THE PROJECT

Land use in Yolo County is regulated by the Yolo County General Plan, zoning regulations, and the agricultural preserve contracts covering the subject parcel. Air quality is regulated by the Yolo-Solano Air Control Board which controls agricultural burning. The proposed division will produce no solid waste, and will have no impact on water quality.

VII. OBJECTIONS

No known individuals, companies, groups, or governmental agencies have made known any objection to the proposed division of land.

IX. SUPPLEMENTS

No supplemental material has been attached.

ADDENDUM TO MAST LAND DIVISION E.I.R.

The following supplemental comment is provided by the Yolo County Planning Department in response to the draft E.I.R. submitted on behalf of the Mast family land division proposal.

Review of the E.I.R. by the Planning Department staff indicates that the draft E.I.R. is generally satisfactory, although the following clarifications are offered for specific sections of the E.I.R.

Once again on Page 10, outline Section #6 Aesthetics, the E.I.R. speaks only to the act of creating the parcel and does not look beyond to the possible visual impact an additional dwelling and farm headquarters could have, if established on the parcel created.

Within Outline Section IV, ENVIRONMENTAL IMPACT on Page 11, and specifically those sub-topics entitled WATER, WASTE and AIR, staff would like to express the following.

Although the division will have no direct and immediate effect on runoff or drainage and will not create additional solid or liquid wastes nor impact air quality, in the long run, if the parcel created is subsequently sold, measureable impacts on water, wastes, air and traffic could all occur.

Mitigative Measure #2 on Page 13 indicates that there is little likelihood for economic inefficiency if the parcel is split. This statement appears to be based upon the premise that the parcels created will continue to be held by the Mast family, and farmed as a single unit. We must comment that this assumption, no matter how valid today, may not accurately reflect what can be anticipated in the future. There must come a day when the parcel will be obtained by someone outside the Mast family, who will wish to farm it independently. Should this occur, the 40+ acre parcel may or may not be an economical farming unit. With today's conditions and level of technology, it is generally agreed that 40+ acres can be an economical farming unit, although certainly at the small end of the farming spectrum. As farming techniques change and technology advances, this may not be the case in the future, in which case the parcel created would be uneconomical from a farming standpoint.

Finally, Mitigative Measure #4 on Page 13 attempts to discount the impact of splitting a parcel within the Agricultural Preserve by referring to a precedent setting split accomplished earlier for estate planning purposes. In our opinion, any split of Agricultural Preserve land must be considered to be significant and must be reviewed on its own merits rather than placed entirely within the context of how many divisions of a similar nature have been allowed previously. We cannot support a position which perpetuates or reinforces an act which may be contrary to stated County policy.

B. Project Objective

The project objective is to divide a 95 acre parcel of land, held by the owners as tenants in common, into two parcels. One parcel is to be held by them in common, and the other is to be held solely by Jack D. Mast. This division is part of a series of land divisions between the owners which will result in each owning the land on which his or her personal residence is located. This will eliminate estate planning problems resulting from the multiple ownership of the land on which their respective residences currently stand. The proposed division will require the approval of Yolo County Planning Agencies. ✓

C. Project Location

The site of the proposed division is a 95 acre parcel in central Yolo County, approximately 2 miles northeast of Esparto. The site is bordered on the North by the West Adams Canal and on the South by Cache Creek.

II. DESCRIPTION OF PROJECT

A. Project Plans

1. Detailed description of the site plan:

- a. Agricultural land use
- b. The 95 acre site will be subdivided into 2 parcels with the following approximate acreages:

Northerly Parcel	38 acres
Southerly Parcel	57 acres
- c. No structures are to be built. ✓
- d. No additional amenities are to be constructed.
- e. The proposed division is shown on the site plan map attached.

2. Circulation:

The existing extension of county road 19A will continue to be used as it has been used in the

past. No improvement to any road is planned. No additional traffic, nor traffic disruption will be generated by the division.

3. Population:

No increase in population will result from the division.

4. Services:

No services or utilities will be altered or created.

5. Project Phasing:

All transfers of title will occur at once.

6. Conformance with general plan documents:

The Master Plan of the County of Yolo designates an agricultural land use for the project site. The plan permits "agricultural uses only, with new residential subdivisions prohibited...except those directly related to and incidental to the agricultural operations conducted upon the land." According to the Yolo County Zoning Code the project site is zoned "A-P" any subdivision of "A-P" land requires approval of Yolo County Planning Agencies.

B. Construction and Operational Plans

1. Extent of site clearing:

No site clearing is required.

2. Excavation:

No excavation is required.

3. Drainage Plans:

Drainage is by way of surface runoff and soil percolation. No impervious surface will be added. All drainage will be controlled by existing irrigational systems.

4. Utilities:

No additional utilities will be required.

5. Revegetation:

The land will be commercially farmed.

6. Maintenance:

Maintenance will be conducted in the normal course of farming operations.

7. Other Construction Aspects:

There are no other construction aspects.

III. ENVIRONMENTAL SETTING

A. Natural Environment

1. Geologic and pedologic conditions:

- a. Geomorphically, the site is essentially level. Along the northern perimeter of the project site lies the West Adams Canal. Along the southern perimeter lies Cache Creek.
- b. There apparently are no major active faults transecting any of the major inhabited areas of Yolo County. Major fault zones lie to the west, along the Pacific Coast in the San Andreas Fault Zone and to the east, along the Sierra Nevadas.
- c. The U. S. Department of Agriculture classifies the soil in the project area into three basic types:

1. Loamy Alluvial Land

Loamy alluvial land (Lm) is a land type that consists of such highly variable soils that, for the purposes of this survey, it was impractical to classify and map them separately. These soils are nearly level and excessively drained. They formed in mixed, stratified alluvium recently deposited adjacent to streams. They have a texture of sand, sandy loam, loam, and silt loam, and they are underlain, at a depth of 24 to 40 inches, by sand and gravel. Slopes are 0 to 2 percent. Elevation ranges from 25 to 400 feet. The annual temperature is 62° F., the annual rainfall is 16 to 20 inches, and the frost-free season is about 270 days. The vegetation is chiefly annual grasses, herbs, willows, tamarix, and cottonwood. Loamy alluvial land is associated principally with Reiff and Soboba soils.

Included in mapping are small areas of Reiff gravelly loam, Soboba gravelly sandy loam, and Yolo silt loam. Also included, near the Colusa County line and the Colusa drainage canal, is an area that is subject to flooding for a period of more than 48 hours about once in every 2 years.

Permeability is rapid. Surface runoff is very slow, and there is little or no erosion hazard. The available water holding capacity is 2.0 to 4.0 inches. Rooting depth is 24 to 40 inches. Natural fertility is moderately high.

This land type is used mainly for dryland pasture, alfalfa, tomatoes, and almonds. It also is used as wildlife habitat and for recreation. Capability unit IVs-4 (17).

2. Soboba Series

The Soboba series consists of excessively drained very gravelly loamy sands on alluvial fans. Slopes are less than 1 percent. The soils formed in alluvium from sedimentary rocks. Elevation ranges from 25 to 400 feet. Annual temperature is about 61° F., annual rainfall is 16 to 20 inches, and the frost-free season is about 260 days. Vegetation consists of annual grasses, forbs, scattered oaks, saltcedar, and willow. Soboba soils are associated principally with Loamy alluvial land and Riverwash.

In a typical profile, the surface layer is pale-brown gravelly sandy loam and very gravelly loamy sand about 11 inches thick. The substratum is light brownish-gray very gravelly loamy sand that is highly stratified with sand and gravel lenses to a depth of more than 60 inches.

Soboba soils are used for irrigated row crops, irrigated pasture, dryland pasture, wildlife habitat, and recreation.

Soboba gravelly sandy loam (Sn). --This soil is on alluvial fans. Slopes are less than 1 percent.

Representative profile, 1,000 feet north of the west end of the big barn of the Fulton

Stephens-Ranch headquarters, 1.5 miles northwest of Esparto; the profile, when examined, was moist below a depth of 17 inches.

Included in mapping are small areas of Arbuckle gravelly loam, Loamy alluvial land, Reiff very fine sandy loam, Reiff gravelly loam, and Riverwash.

This Soboba soil is very rapidly permeable. Surface runoff is very slow, and the erosion hazard is none to slight. The available water holding capacity is 2.5 to 3.5 inches. The effective rooting depth is more than 60 inches. Natural fertility is low.

This soil is used mainly for dryland pasture. Other uses include irrigated grain sorghum and irrigated pasture, wildlife habitat, and recreation. Capability unit IVs-4 (17).

3. Yolo Series

The Yolo series consists of well-drained silt loams and silty clay loams on alluvial fans. Slopes are 0 to 2 percent. The soils formed in alluvium from sedimentary rocks. Elevation ranges from 25 to 400 feet. The average annual temperature is 60°F., the annual rainfall is 16 to 22 inches, and the frost-free season is about 270 days. In uncultivated areas the vegetation is annual grasses and forbs. Yolo soils are associated principally with Brentwood and Reiff soils.

In a typical profile, the soil is grayish-brown to pale-brown silt loam and silty clay loam that extends to a depth of more than 60 inches. In some areas the soil is silty clay loam throughout the profile.

Yolo soils are used for orchard, row crops, forage crops, truck crops, irrigated pasture, dryfarmed grain, wildlife habitat, and recreation.

Yolo silt loam (ya). --This soil is on alluvial fans. Slopes are less than 1 percent.

Representative profile (fig. 5), 90 feet east of center of field road, 3,150 feet

west of State Highway 113, and 160 feet south of center of Hutchinson Drive on the property of the University of California at Davis; the profile, when examined, was moist below a depth of 2 inches.

Included in mapping are small areas of Arbuckle gravelly loam, Brentwood silty clay loam, Loamy alluvial land, Reiff very fine sandy loam, Soboba gravelly sandy loam, Sycamore silt loam, and Zamora loam. Also included are some areas where slopes are 2 to 5 percent.

This Yolo soil is moderately permeable. Surface runoff is very slow, and the erosion hazard is none to slight. The available water holding capacity is 9.0 to 11.0 inches. The effective rooting depth is more than 60 inches. Natural fertility is high.

This soil is used mainly for almonds, walnuts, corn, sugar beets, tomatoes, alfalfa, and melons. Other uses include dryfarmed barley, wildlife habitat, and recreation. Capability unit I-1 (17).

d. There are no unusual or significant features.

2. Hydrologic Conditions:

a. Surface Water: With the exception of Cache Creek and West Adams Canal paralleling the southern and northern perimeters, no surface water or ponds were observed during site investigation. Erosion is negligible. Drainage on the site is controlled through the use of a comprehensive irrigation system. The topography of the site is relatively flat for the most part.

No increase in surface runoff flows is expected to occur upon completion of the division. The topography will remain essentially level, thus ruling out any erosion and siltation problems due to project implementation. The surface water in Cache Creek and West Adams Canal will be unaffected.

- b. Ground Water: Groundwater depth is 50± feet below ground level. Use of wells in the vicinity of the project site provide irrigation for agricultural crops. This estimate was given to the consultant by well drillers with many years experience in the area of the project site.
- c. Water Quality: Ground water quality will not be materially affected by this project.
- d. Hazards: Cache Creek presents no significant flood or health hazards.

3. Atmospheric conditions:

- a. Climate: Generally, Yolo County is mostly sunny; however, areas in the south part of the county have a higher rate of humidity than areas in the north. This is due to maritime air flows. The fogs in winter may last from two days to three weeks with humidities close to 100 percent. Temperatures in summer are warm to hot, averaging 95 degrees or higher over most of the county. Maximum summer time temperatures observed for this area is listed as being 111 degrees, and the minimum is listed as 19 degrees. Average annual rainfall for this area is 16 inches. Winds blow from a southerly direction most of the year. Occasionally, north winds may blow from the north during summer.
- b. Air Quality: The primary source of the constituents of photochemical smog is exhaust emissions from vehicles with internal combustion engines. It is estimated that 80 percent of the hydrocarbons and 90 percent nitrogen oxides emitted into the air in the Sacramento area comes from motor vehicles. The proposed project, will result in no additional air pollutants. Air quality is regulated by the Yolo-Solano Air Quality Board which regulates agricultural burning.

4. Vegetation and Wildlife:

- a. Plant varieties occurring on the site are those common to agricultural-weed field plant communities in the Sacramento area. The plants occurring on the site are comprised of grasses, broad leaf forbs and other plants that are considered to be "weeds" by man.
- b. There are no high fire potential species of plants on the land due to its agricultural use.

- c. There are no rare or endangered plant species or undisturbed or unique vegetation communities on or in the vicinity of the division.
- d. Most of the common animal wildlife which may be found on the project site may include, but are not limited to, the following species: moles, hares, gophers, rodents, ground squirrels, ring neck pheasants, valley quail, songbirds, a few species of reptiles and other small animals.
- e. A riparian community exists in the southern perimeter of the site on the banks of Cache Creek. Running water is important to their support. Plants common to riparian communities include sycamore, cottonwood, willow, laurel, bigleaf maple, wild grape, cat-tail, mulefat, bullrush, and poison oak. Birds especially dependent on this community are Red-Tailed Hawk, California Quail, Ring-necked Pheasant, Screech Owl, Great Horned Owl, Acorn Woodpecker, Nut-tall's Woodpecker, Black Phoebe, Scrub Jay, White-breasted Nuthatch, Bewick's Wren, Mockingbird, Starling, Hutton's Vireo, Brown-headed Cowbird and Song Sparrow. Bullfrog, yellow-legged frog, Pacific treefrog, California newt and tiger salamander make up the representative amphibian population. Western garter snake, common garter snake, racer, Pacific pond turtles and western fence lizard are common to the community. California gray fox, brush mouse, opossum, black-tailed jackrabbit, raccoon, beaver, long-tailed wasel, California mink, California spotted and striped skunk, California river otter, bobcat, and blacktailed deer are inhabitants of riparian habitats in Yolo County.
- f. There are no rare or endangered animal species on or in the vicinity at the site.

B. Socio-Cultural and Socio-Economic Factors

1. Cultural Resources:

No known sites of archaeological or historical significance are located on the project site, and other than farming, minimal use of the site has been made during the past decade. The project site is not known for any events of local, state, or national historical significance. There are no recorded archaeological sites, no state registered landmarks, no state points of historical

interest, and no mention on the national register.

2. Energy Uses and Conservation:

The division will result in no increased energy use, nor construction.

3. Population:

The only permanent residents on the effected parcel are the Jack D. Mast Family. No increase in population will result from the division.

4. Land Use:

The site is currently vacant of any buildings, streets, or improvements except for the existence of a family residence and several farm buildings on the northerly one-half of the parcel. Other than farming, there are no indications that the site has been used for the past decade. Currently all lands surrounding the project site are used for farming purposes.

Zoning on the project site is "A-P" surrounding land is zoned "A-P" and "A-1". Single-family residences on parcels containing 5 more acres, are conditional uses in the "A-1" zone. Historically, the site has been designated on the General Plan, zoned and used for agricultural purposes.

5. Public Facilities:

Agencies responsible for providing the following services to the project:

- a. Police: Yolo County Sheriff's Department and California Highway Patrol.
- b. Fire Protection: Esparto Fire District.
- c. Schools: Esparto Joint Unified School District.
- d. Utilities: Pacific Gas and Electric Company, Pacific Telephone Company; water service provides by individual wells.
- e. Solid waste disposal: Hauled by the residents.
- f. Other services are provided by Yolo County.

6. Aesthetic:

Existing aesthetic conditions on the project site are primarily open space benefits. The proposed division will have no visual impact.

7. Nuisance:

The division will result in no additional nuisance. Prevailing ambient noise levels affecting the site are those originating from large farm machinery and truck traffic associated with neighboring farm areas. The proposed project will become an insignificant element in the noise environment in the vicinity of the project site.

8. Economic:

The proposed division will have no economic impact on cost-revenue balances or local revenues.

IV. ENVIRONMENTAL IMPACT

A. Natural Environment

SOIL

No alteration of soils will result, other than that resulting from soil preparation pursuant to farming operations.

VEGETATION

No alteration of existing vegetation will result other than crop rotation.

WILDLIFE

No additional impact on local wildlife will result. Cultivation has already discouraged small mammals from inhabiting the site.

WATER

No alteration in water use is anticipated. The division will have no effect on runoff because the existing drainage will be maintained.

WASTES

No liquid or solid wastes is anticipated from this project.

AIR

✓ No effect on air quality is anticipated. ✓

No increase in vehicular traffic is anticipated. ✓

B. Socio-Cultural and Socio-Economic Factors

SCHOOLS

No increase in school age children will result.

POLICE

There will be no impact on existing police services.

CULTURAL RESOURCES

There will be no socio-cultural impacts.

ENERGY USE

There will be no increase in energy use.

CONSERVATION

No increase in water use or runoff is anticipated.
No erosive impact is foreseen.

V. SUMMARY OF IMPACTS AND THEIR DISPOSITION

A. Unavoidable Adverse Effects

The following summarizes potential environmental impacts that are unavoidable should the proposed project be implemented. These considerations are numbered sequentially, and mitigation measures described in a following section bear corresponding numbers.

1. The proposed division results in the creation of one additional potential homesite on the southerly portion of the parcel.
2. The proposed division results in two smaller, potentially economically inefficient parcels of agricultural land.
3. The presence of a potential homesite creates a potential conflict with the agricultural character of the southerly portion of the parcel.
4. The proposed division might serve as a precedent allowing the split of "A-P" land.

B. Mitigation Measures Proposed to Minimize Adverse Impacts

1. Although the division results in the creation of an

additional potential home site, the probability of the construction of a home is unlikely in light of the multiple ownership of the proposed southerly parcel.

2. Although the division will result in two smaller agricultural parcels, the probability of them becoming economically inefficient is considered to be quite low in light of the historical agricultural use of this land by the Mast Family which farms other agricultural land contiguous to the effected parcel. Additionally the smaller parcel will be nearly 40 acres which is generally recognized as an economically viable parcel size.
3. Historically the parcel has been farmed as one piece of agricultural land in conjunction with contiguous agricultural land farmed by the Mast family. The northly parcel contains farm buildings and the residence of Jack Mast and the other owners reside in residences located on property which they will solely own as a result of this series of land divisions. As a result of this it is considered highly unlikely that any residential or farm structures will be constructed on the southerly parcel. Even if any structure were located on the parcel it would constitute only a negligible impediment to agricultural operations.
4. The proposed division creates no precedent for splitting "A-P" land. The precedent for splitting "A-P" land for estate planning purposes has already been set by the Cochoran Estate.

C. Alternatives to the Proposed Action

The only possible alternative is no action. This would be an unacceptable alternative inasmuch as it would result in considerable estate planning difficulties for the parties involved. In light of the minimal environmental impact of the proposed division of land complete inaction would appear to be unwarranted.

D. The Relationship Between Local Short-Term Uses of Man's Environment and the Maintenance and Enhancement of Long-Term Productivity

The proposed subdivision will have no impact on the existing use of the land involved. It is currently cultivated as productive agricultural land and will continue to be so cultivated in the future. Clearly the preservation of open space and economic productive contemplated are beneficial to the environment and

constitutes no negative environmental impact. Deferring the proposed land division to a later point in time would result in no minimization of environmental impact inasmuch as the anticipated environmental impact resulting from action at this time is negligible.

E. Irreversible Environmental Changes

The proposed subdivision of land would result in no irreversible environmental change. The land will remain open space under active agricultural cultivation. Water drainage will be accommodated by the existing irrigation system with no sedimentation or effect on water quality. There will be no increased air pollution or increased demands on ground water. There will be no impact on existing animal and plant habitats. The proposed subdivision of land involves no consumption of essential non-renewable energy resources or non-renewable natural resources.

F. Growth Inducing Impact

The growth inducing impact of the proposed subdivision of land is limited to the creation of one additional home site on the southern portion of the parcel. It is considered highly unlikely that any single family residence will ever be located on that site inasmuch as the entire parcel is currently farmed by the Mast family who controls and farms extensive areas of farm land in the region.

VI. ORGANIZATIONS AND PERSONS CONSULTED

Information provided by Lauggenour & Meikel by the University of California was used in the preparation of this report. In addition, certain information was provided by the Yolo County Planning Department.

VII. PUBLIC POLICIES, LAWS, AND REGULATIONS RELATED TO THE PROJECT

Land use in Yolo County is regulated by the Yolo County General Plan, zoning regulations, and the agricultural preserve contracts covering the subject parcel. Air quality is regulated by the Yolo-Solano Air Control Board which controls agricultural burning. The proposed division will produce no solid waste, and will have no impact on water quality.

VII. OBJECTIONS

No known individuals, companies, groups, or governmental agencies have made known any objection to the proposed division of land.

IX. SUPPLEMENTS

No supplemental material has been attached.

Cowles Mast
Assessor's Parcel Nos. 48-210-07,
49-020-05 and 55-090-06
YC-48-9-1-76

The applicant proposes to divide three parcels within the Agricultural Preserve Zone (Parcel Nos. 55-090-06, 49-020-05, and 48-210-07) Subject parcels are located northeast of Esparto in Central Yolo County.

The proposed division would follow an existing road and include certain buildings located on the property. The proposed division of parcel 49-020-05 would follow an existing ditch which bisects the property. The division of parcel No. 48-210-07 would bisect the parcel along an existing road; with the smaller of the two parcels encompassing somewhat less than 40 acres. Neither of the other divisions would create parcels smaller than 40 acres in size.

In support of the proposed division of parcel No. 48-210-07, which would create two parcels of 38+ and 57+ acres each, the applicant has submitted a draft EIR, due to the relatively small acreages of these parcels.

With the other proposed divisions, larger parcels are contemplated, and the environmental impact is believed to be mitigated to some extent by the larger size of the parcels. The applicant is, therefore, submitting an additional ND to cover division of the remaining two parcels.

The applicant believes that although an EIR might normally be required for this type of project, due to the following factors, the adverse environmental impact of the proposal is greatly mitigated.

1. An EIR is being submitted to address the negative environmental impact of the smaller parcels proposed;

2. The division of the two parcels being addressed by this Negative Declaration are larger in size, therefore creating less adverse impact on the potential agricultural use of the land;
3. The proposed parcels would still be farmed as one unit in the future.

Negative Declaration

Mary Grace Mast - Jack Mast -
Cowles Mast
Assessor's Parcel Nos. 48-210-07,
49-020-05 and 55-090-06
YC-48-9-1-76

The applicant proposes to divide three parcels within the Agricultural Preserve Zone (Parcel Nos. 55-090-06, 49-020-05, and 48-210-07) Subject parcels are located northeast of Esparto in Central Yolo County.

The proposed division would follow an existing road and include certain buildings located on the property. The proposed division of parcel 49-020-05 would follow an existing ditch which bisects the property. The division of parcel No. 48-210-07 would bisect the parcel along an existing road; with the smaller of the two parcels encompassing somewhat less than 40 acres. Neither of the other divisions would create parcels smaller than 40 acres in size.

In support of the proposed division of parcel No. 48-210-07, which would create two parcels of 38+ and 57+ acres each, the applicant has submitted a draft EIR, due to the relatively small acreages of these parcels.

With the other proposed divisions, larger parcels are contemplated, and the environmental impact is believed to be mitigated to some extent by the larger size of the parcels. The applicant is, therefore, submitting an additional ND to cover division of the remaining two parcels.

The applicant believes that although an EIR might normally be required for this type of project, due to the following factors, the adverse environmental impact of the proposal is greatly mitigated.

1. An EIR is being submitted to address the negative environmental impact of the smaller parcels proposed;

2. The division of the two parcels being addressed by this Negative Declaration are larger in size, therefore creating less adverse impact on the potential agricultural use of the land;
3. The proposed parcels would still be farmed as one unit in the future.

Negative Declaration
Land Division Plat #2671
William Justice Property
Assessor's Parcel No. 5-704-01
NOTE: Date of Hearing - March 2, 1977

The applicant requests a Land Division Plat to divide an existing 0.45 acre parcel into one 104.5' by 80' (19 acre) lot and one 107.5' by 104.5' (26 acre) lot in the Light Industrial (M-1) Zone located on the southwest corner of the intersection of Kentucky Avenue and Freeman Street. Subject site is adjacent to the city limits of Woodland.

Currently, existing on the site is a 9,048 square foot building, 2 gravel roadways from Kentucky Avenue, one gravel roadway from Freeman Street, and packed gravel on the remainder of the site. Water and waste water disposal is currently provided by the City of Woodland. The existing surface water disposal is by a roadside ditch drain.

Although this project might normally have significance, the staff determined on December 9, 1976 that the land division will have a negative impact on the environment for the following reasons:

1. The lot sizes after the proposed land division is consistent with the zoning regulations and general plan designation;
2. Since the property is already urbanized, no additional services are required and the land doesn't need to be altered.
3. The proposed use, small equipment repair shop, is also consistent with the M-1 zoning regulations.

RESOLUTION NO. 77- 121

(Resolution Ordering A Reorganization Consisting of Detachment of Territory from the Springlake Fire Protection District and Annexation of Said Territory to the City of Woodland - Community Lane)

WHEREAS, this Board hereby makes the following recitals:

1. A Resolution of Application for Reorganization consisting of the detachment of territory from the Springlake Fire Protection District and annexation of said territory to the City of Woodland was adopted by the Council of the City of Woodland on July 5, 1977, requesting initiation of proceedings for the accomplishment of said reorganization, and said resolution was duly filed with the Yolo County Local Agency Formation Commission.

2. On July 26, 1977, there was filed with the Clerk of the Board of Supervisors, County of Yolo, State of California, a Resolution Making Determinations of the Yolo County Local Agency Formation Commission directing this Board to initiate proceedings for reorganization of territory as described above.

3. On August 2, 1977, this Board adopted its Resolution Initiating Proceedings for reorganization and ordered a hearing to be held on said resolution on August 30, 1977, at the hour of 2:00 P.M., in the Chambers of the Board of Supervisors, Room 207, County Courthouse, Woodland, California, and directed its Clerk to cause notice of said hearing to be published and posted and mailed as required by law.

4. Notice of this public hearing was published, posted and mailed as directed by said Resolution Initiating Proceedings, and as required by law.

5. The matter of said reorganization came on for hearing at the time and place set forth in said notice.

6. At the hearing, prior to consideration of protests, the Yolo County Local Agency Formation Commission's Resolution Making Determination was summarized or read aloud.

1 7. This Board received and heard any and all written and oral
2 protests to said reorganization.

3 8. This Board heard and considered all the factors required
4 by Government Code §56435, and in particular, this Board received
5 and considered the following:

6 (a) A report on said reorganization submitted to the
7 Yolo County Local Agency Formation Commission by
8 its Executive Officer which was also filed.

9 (b) The Resolution of Determination adopted by the Yolo
10 County Local Agency Formation Commission on July 25,
11 1977.

12 (c) The Negative Declaration as adopted by the Yolo County
13 Local Agency Formation Commission on July 25, 1977,
14 which Negative Declaration was adopted by this Board.

15 (d) All testimony from interested persons.

16 (e) Any factors which may be considered by the Local
17 Agency Formation Commission as provided by the Knox-
18 Nisbet Act.

19 (f) All other matters which it has deemed material to the

21 9. This Board has determined that the proposed reorganization
22 does not provide for the formation of, or the annexation or
23 detachment of territory to or from a benefit district, and that
24 the terms and conditions of the proposed reorganization do not
25 provide for the formation of a new improvement district, or the
26 annexation or detachment of territory to or from an existing
27 improvement district.

23 ating Proceedings for reorganization and ordered a hearing to be

Re: Parking Restrictions and
Street Lighting on
Simon Terrace

Dear Chairman Thompson and Members of the Board:

RECOMMENDATION:

That your Board adopt the attached resolution restricting parking on the cul-de-sac in Simon Terrace, and authorize the Director of Public Works to cause the street light to be replaced on Simon Terrace approximately midway between SH 16 and the Northern terminus of Simon Terrace.

TRANSMITTALS:

1. Draft of "No Parking" resolution.
2. Letter from Solano Property Investment Company dated June 15, 1977.
3. Letter from Bryte County Fire Protection District dated June 2, 1977.
4. Sketch of map indicating requested no parking and proposed no parking.

DISCUSSION:

Observations by the Department on different occasions indicate that movement of emergency vehicles could be hindered by vehicles parking in the cul-de-sac. This is usually caused by random and irregular parking habits along the curve. It is therefore recommended that parking be prohibited as indicated in orange on the attached sketch.

You will note there is a difference between the "no parking" limits as requested and that as proposed. We feel that parking restrictions along the tangent portion of Simon as requested would be unduly restrictive and inappropriate at this time.

The requested street light is within Elkhorn Village Lighting District No. 1. It is customary in high density residential zones and high public use areas (church and commercial) such as this to provide midblock lighting. The light has been inadvertently removed and should be replaced. A credit for payments made will be applied to future billings by P. G. & E.

Respectfully submitted,

Dear Board Members and Director,

I am Belford M Spurlock, president of Solano Property Investment Company which is the General Partner of the limited partnership, Simon Terrace Investors, which purchased the Simon Terrace Apartments on May 16, 1977. This property is located at 900 Simon Terrace, Broderick, Ca. and consist of 126 one and two bedroom apartments. The property has sufficient on-site parking for residents and guest; however, it has become a practice of the residents and guest to park on Simon Terrace, the street in front of the property. After work hours the street is normally lined solid with cars nearly all of which park approximately halfway on the sidewalk. This is breaking the sidewalk in some places. (the rounded curbs encourage this) This parking causes traffic flow restrictions particullary for emergency vehicles, makes it difficult to clean and maintain the street and detracts from the overall appearance of the adjacent properties. Mr Cecil Melzger, road supervisor 2, district 1, has advised me that I may quote himeas wishing to join me in this request, as well as the Bryte County Fire Protection District. (please see attached letter)

I have installed mercury-vapor lighting in the rear parking lots to improve security for the residents parking and the Yolo Sheriff's Department has been giving us excellant supporty in improving the overall security at Simon Terrace. (a common reason given by residents for parking on the street has been a lack of security in the parking lots)

Simon terrace street serves our property, a vacant lot, and one small apartment property on the west side of the street. The church and the commercial property front on Sacramento Blvd. The Cul-de-sac portion of the street is only 20 feet wide.

In view of the above I request that the Board and/or Director take appropriate action to cause "no parking signs" to be installed on Simon Terrace Street to prohibit parking in front of the Simon Terrace Apartments as marked on the attached plot map. In addition, I request that the street light be installed approximately as marked. A pole is already there and it appears that a light has been taken off.

Thank you.

Sincerely,

Belford M Spurlock

Dear Sir:

As that you are the new owner of the apartment complex at 900 Simon Terrace, Broderick, California this office must inform you of some violations and dangerous practice that has been taking place at the complex even before your ownership.

- (1) VEHICLES PARKING IN FRONT OF FIRE HYDRANTS:
As stated in the California Vehicle Code sec. 22514 the parking of vehicles must not take place within 15 feet of a fire hydrant.
Please paint the curbs in front of both hydrants, "Red". *Has been done.*
- (2) General Parking of Vehicles:
It is very difficult to get large firefighting vehicles to the northern most hydrant when cars are parked in the "circle". If it is possible it would help very much if this area was posted NO PARKING.

I hope you will be able correct these problems. If I can aid you in some way please call.

Sincerely yours,

Lt. Michael E. Richardson

Assessor's Parcel Nos. 8-112-08 & 8-112-33

Isaac Chavez, Applicant

NOTE: Date of Hearing - June 1, 1977

The applicant requests a variance and a Tentative Map to create two legal lots at 485 and 501 Pecan Street in West Sacramento. Subject site is located in the Multiple-Family Residential (R-3) Zone and is in an area designated on the General Plan for medium density residential.

A variance is needed to create the two lots, 44' by 170', because Section 8-2.1006^(b) of the code states that a minimum 60' lot width is required and the applicant requests only a 44' wide lot. Currently existing on subject parcel is two single family dwellings, a garage, and a storage shed.

Although this project might normally have significance, the staff determined that a Negative Declaration was appropriate for the following reasons:

1. There will be no environmental change as homes and improvements already.
2. No new improvements are proposed.
3. The project is to create two legal parcels.

The applicant requests a Tentative Parcel Map to divide an existing 2.22 acre parcel into one 1.07 acre parcel and one 1.15 acre parcel in the Residential-Suburban (R-S) Zone for the purposes of creating two rural homesites. Subject site is located on the east side of Jefferson Boulevard, approximately 150 feet south of Higgins Road in Southport.

Although this project might normally have significance, the staff determined a Negative Declaration was appropriate for the following reasons:

1. The project is consistent with the East Yolo Area General Plan designation of low density residential and Residential Suburban zoning;
2. The size of the proposed parcels, 1.07 acres and 1.15 acres, is larger than the minimum 0.5 acre lot required by the Zoning Regulations for R-S Zoning.
3. These two parcels were once part of the Jefferson Boulevard Subdivision, but because the proposed parcels do not follow the original subdivision lines exactly, a new map needed to be filed.

Assessor's Parcel No. 41-020-18-1

Bruce M. Waynick

NOTE: Date of Hearing -
December 1, 1976

The applicant requests a variance to create a 1.95 acre homesite and seeks permission to split the small portion of land where a house already exists from an existing 32.95 acre parcel in the Agricultural General (A-1) Zone. Subject site is located on the south side of County Road 25-A between the old State Route 113 and the proposed State Route 113, just south of Woodland.

A house, tank house, storage shed, well house and septic tank system already exist on the proposed 1.95 acre homesite. The applicant says he requests the split because he plans on retiring and wants to keep his house while selling the remainder of property so it could remain in agricultural use.

Although this project might normally have significance, the staff determined on October 7, 1976 that a negative declaration was appropriate for the following reasons:

1. There are similar small sized parcels in the vicinity;
2. The remaining large parcel will continue in agricultural usage and therefore will be consistent with the General Plan;
3. Because a homesite already exists on the proposed small parcel, the split would only allow one additional homesite.

A copy of the initial statement is on file in the Office of the Planning Department, 292 West Beamer Street, Woodland, CA.

(Resolution Regarding the Cache Creek Tule Elk Herd)

WHEREAS, the present range of this herd encompasses portions of the County of Colusa, and the County of Lake, near the County of Yolo boundary; and

The applicant requests approval of a Variance to divide 13.51+ acres into four parcels: Parcel 1 containing 1.706 acres, Parcel 2 containing 3.194 acres, Parcel 3 containing 1.706 acres and the remaining Parcel with 6.195 acres.

Subject property is located on the east side of County Road 100A, 495 feet south of State Highway 16, adjacent to the City of Woodland. The proposed Parcels 1 and the north half of Parcel 2, lie within the Service Commercial (C-3) Zone and Parcels 3, 4 and the south half of Parcel 2 are Agricultural General (A-1).

Parcel 1 presently contains the Multi-View building for Cable Television. Parcel 2 will be assembled with a parcel to the north which presently contains a tomato inspection station with access on State Highway 16. Parcels 3 and 4 are presently cultivated and will remain in that present condition.

Surrounding properties are extremely diverse with commercial agricultural and residential development.

Although this project might normally have significant impact, the staff has determined that based on the information provided by the applicant, that it is not significant and a Negative Declaration is appropriate for the following reasons:

1. The proposed split is consistent with the zoning.
2. An existing subdivision on this property created four parcels. The proposed split will only create four parcels.

Elaine Garcia, Owner-Applicant
NOTE: Date of Hearing - July 6, 1977

This application involves a request for a variance and a Tentative Parcel Map to create three lots, 50' X 110' each, from an existing 150' X 110' lot located at 1652, 1656 and 1660 Citrus Avenue in Bryte, California. Subject site is currently zoned Multiple-Family Residential (R-3) and is designated on the General Plan for Medium Density Residential.

Currently existing on the site are three single-family dwellings. The applicant requests the split so he can sell off each house separately. The applicant needs a variance because the ordinance requires a 60' lot width and 7,000 square feet for lot area while the applicant is proposing 50' lot widths and 5,500 square feet for each lot.

Although this project might normally have significance, according to the information provided by the applicant, the staff determined a Negative Declaration was appropriate for the following reasons:

1. There will be no environmental change as the homes already exist and no new street uses will be constructed on the property.
2. There are similar sized parcels in the vicinity as it is an old established residential neighborhood.
3. The proposed project is consistent with the residential designation.

NEGATIVE DECLARATION
ENVIRONMENTAL SIGNIFICANCE

No. 27-7

The Yolo County Planning Commission has reviewed all available information on the environmental effect of the project described as request for variance to allow the creation of three parcels with less than the required lot width, each containing an existing home, located at 1652 Citrus Avenue, 1656 Citrus Avenue, and 1660 Citrus Avenue in Drye, California, in the Multiple Family Residential (R-3) Zone, Assessor's Parcel Nos. 14-460-28, 29, and 30.
Zone File #2703

The Planning Commission has determined that:

1. The project described is one that would ordinarily be expected to have a significant effect on the environment, and
2. The project will have no significant adverse effect on the environment due to circumstances peculiar to the specific project.

An Environmental Impact Report will not be required.

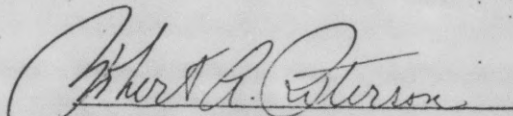

Said determination was made at a Public Hearing held on July 6, 1977 in compliance with the California Environmental Quality Act and Title 10 of the Yolo County Code. Appeals from this determination may be made within fifteen (15) days of said action by filing a letter of appeal with the Clerk of the Board of Supervisors as prescribed for appeals from decisions of the Board of Zoning Adjustment.

Donald Aldrich, Applicant-Owner

NOTE: Date of Hearing - August 3, 1977

This application originally came before the Commission at the January 5, 1971 meeting, at which time the applicant requested and was granted a use permit and a land division plat to create a 5 acre homesite, containing an existing house, from a 260 acre parcel in the Agricultural-General (A-1) Zone. Since that time, the use permit expired and the applicant sold the 5 acre parcel without recording the land division plat, and put the remainder of the property in the A-P Zone.

The applicant now requests a conditional use permit and a parcel map to correct the situation and create a legal 5 acre residential building site in the Agricultural General (A-1) Zone and a 107.9 acre parcel in the Agricultural Preserve Zone. Approximately 147 acres of the original 260 acres has been previously split off by the courts to settle an estate. The 147 acre parcel is also in the Agricultural Preserve (A-P) Zone.

Subject site is located on the northwest corner of the intersection of Jefferson Boulevard and Hamilton Road, in the Clarksburg Area. Currently existing on the proposed 5.0 acre parcel is a house, garage, three accessory buildings, a well, septic tank and roadside drain. No improvements are planned on the parcels.

Although this project might normally have significance, staff determined a Negative Declaration was appropriate for the following reasons:

1. The environment will not change as the house already exists on the site.
2. From the information provided by the applicant, no improvements are proposed on the property, therefore the density and the land use will not change.

WHEREAS, this Board of Supervisors desires to initiate proceedings for the annexation of the subject territory to the Clarksburg Fire Protection District by Resolution of Application to the Yolo County Local Agency Formation Commission;

NOW, THEREFORE, BE IT RESOLVED by the Board of Supervisors of the County of Yolo that it adopts this Resolution of Application as follows:

(a) This proposal is made pursuant to Division 1 of Title 6 of the California Government Code, the District Reorganization Act of 1965 (commencing with Section 56000).

(b) The nature of each proposed change of organization and the name or names of all districts for which any such change of organization is proposed are as follows:

(c) The subject territory to be annexed to the Clarksburg Fire Protection District is inhabited and a description of said subject territory is set forth in Exhibit "A" attached hereto and by reference incorporated herein.

(d) The terms and conditions to which the proposed annexation is desired to be subject are:

(1) The willingness of landowners within the subject territory to pay for the costs of providing fire protection service; said costs

1 and method of payment of said costs to be
2 determined by the Clarksburg Fire Protection
3 District and acceptance thereof by said land-
4 owners to be determined pursuant to the provi-
5 sions of California Government Code §§ 56316
6 and 56320; and,

- 7 (2) Those terms and conditions as may be specified
8 by the Yolo County Local Agency Formation
9 Commission in its sound discretion as to any
10 of the matters listed in California Government
11 Code § 56470.

12 (e) The reasons for this proposal are as follows:

- 13 (1) Through a petition, landowners in the subject
14 territory have made known their pressing need
15 for the provision of fire protection service
16 from the Clarksburg Fire Protection District.
17 (2) The subject territory is an inhabited, although
18 dominately agricultural, area that presently
19 is not in any fire protection district.
20 (3) The subject territory present has no official
21 provider of fire protection service.
22 (4) The subject territory lies entirely within
23 Yolo County and is contiguous to the southern
24 boundary of the Clarksburg Fire Protection
25 District.
26 (5) The Clarksburg Fire Protection District is
27 the most logical provider of fire protection
28 service for the subject territory.
29 (6) The proposed annexation will be consistent
30 with Yolo County Local Agency Formation
31 Commission guidelines adopted in
32 Resolution No. 73-10.

1 (f) Request is hereby respectfully made the proceedings
2 be undertaken by Yolo County Local Agency Formation Commission
